Celebration: Engagement: Discourse:

125th Anniversary

On the weekend of November 6 and 7, 1998, the School of Architecture celebrated its 125th anniversary.

The keynote lecture was given by Kenneth Frampton who addressed a group of over 300 students, faculty, alumni and friends in Grant Auditorium at the College of Law on the Syracuse University Campus. Frampton's topic was "The Scope of the Tectonic," After the lecture, a reception was held in 103 Stoeum Hall for all who attended.

Following the lecture and reception, an all-night School charrette began. The Design Challenge, titled "Skinny Structures: A Quick Study of the Tectonic," was defined by faculty organizers Mark Lind and Terrance Goode, to explore possibilities of representation, materiality and spatial manipulation.

The teams were provided with identical kits of materials and supplies, as well as equal access to work areas, tools, and computers. Students, faculty, and alumni worked together in teams through Saturday afternoon when the first projects were presented to a panel of panelists in the fourth floor rotunda at 2pm. The panelists included Kenneth Frampton, together with Dean Abbey and Professors Christopher Gray, Arthur McDermid, Mark Linder, Anne Muny, and alumnus Bruce Fowle (B. Arch '83). The discussion was followed by a reception in the first floor rotunda.

Architecture Students Work with the Community:

The Design of a Public Plaza on the West Side of Syracuse

Students from the School of Architecture are involved in a community service project in Syracuse. The focus of the project is to develop a large parcel of vacant land located in the heart of the west side, the twentieth poorest, predominantly white neighborhood in the United States. The site is the former home of the Ward Bakery Co. which moved out in the 1970's. The vacant structure was torn down in 1995 with federal money obtained by the city, along with residual money set aside from the demolition. Lack of a concrete plan stalled the site's development and led to the possibility that the nearly $180,000 earmarked for the future construction would be lost if a plan for the site was not generated soon.

The School of Architecture was contacted in September of 1998 to determine interest in a collaborative effort. In response, Assistant Professor David Gamble organized a weekend workshop which paired 34 graduate and undergraduate students with neighborhood residents and representatives from the Central New York chapter of the AIA and ASLA. The students worked with ideas to convert the under-utilized land into a public plaza and community structure based on a resident survey taken in the summer of 1998.

On Location Symposium

The School of Architecture, with support from the Graduate Student Organization, sponsored a conference on April 17 and 18. "On Location: Publics, Spaces, Places, Traces" assembled a panel of architects, artists, scholars and critics to "intensify a lingering and possibly irreversible debate over the power, potential and presumptions of the concepts of Space and Place in contemporary discourse on the Public realm."

The Saturday symposium began at noon with featured speakers and a panel discussion. Rosalyn Deutsche, an art historian and critic at Princeton, spoke at noon about "Reasonable Urbanism." Edward Casey, a professor of philosophy at SUNY Stony Brook, addressed "Site, Place and Space in Urban Experience." A roundtable response followed the two lectures.

Sunday featured Traces, a series of colloquia with presentations and discussions by scholars from across the US and Canada, including several members of faculty. "On Location" also included an exhibition at various sites throughout the campus, including all floors of Stoeum Hall, the fourth floor of Bird Library, the second floor of Eggers Hall, and the second floor of the College of Law.
A Message From the Dean

This past year has been one of reflection, loss, and accomplishment for the School of Architecture. In November we celebrated our 125th anniversary as a formal program of study in architecture at Syracuse University with a key-note lecture by Kenneth Frampton, an all-school charrette, and a gala dinner at the Everson Museum. Sadly, only one week later, our former Dean, Werner Seligmann, passed away after a battle with cancer. He is greatly missed, and an endowed lectureship has been established in his honor. In the spring we hosted the visit of the NAAB accreditation team, which resulted in our full five-year accreditation for both the undergraduate (B. Arch.) and first professional graduate (M. Arch.) degree programs. The year ended with a two-day symposium “On Location” dedicated to current trends in urban theory and practice.

Several other events paired the School considerable press coverage during the year, among them the start of a Community Design Center and enrolling the largest first year class in recent school history.

In contrast, this coming year is about the future, curriculum revisions, planning for the expansion of the School and creating new publications that will, I hope, launch us into the new millennium with renewal and confidence. We are counting on you, our alumni, to help in the coming years to sustain the quality of the School with your continued professional achievements, your involvement in the life of the School, and with your generous support.

We thank you in advance!

Sincerely,

Bruce Abbey, Dean

Alumni Events 1999-2000

Mark your calendars and plan to join us for one or more of the following events. Invitations will be mailed to alumni in the vicinity of each event in advance.

October 30:
- Homecoming Weekend Event at Syracuse: Football Pre-Game Reception for Syracuse Area Alumni and Returning Alumni 103 Slocum Hall – 2 hours before kickoff

November 17:
- Boston Alumni Reception 5:00 to 7:00 p.m. at “Build Boston” World Trade Center 164 Northern Avenue, Boston Enter through the Lower Entrance To register in advance (and avoid having to register on location) call Build Boston 1-800-544-1898 or via website: www.buildboston.com The Syracuse Reception is event number B-68 and is free of charge Hosted by Dean Bruce Abbey and Katryn Hansen

December 2:
- Washington DC Reception Syracuse University Greenberg House 5 to 7:00 p.m. Hosted by Dean Bruce Abbey and Professor Christopher Gray

February:
- Basketball Pre-Game Reception for Syracuse Area Alumni S.U. Carrier Dome – Orange Pack Room Date and Time TBA Pending Final Basketball Schedule

March 11-14:
- Reception during ACSA Conference in Los Angeles Date and Time TBA Pending ACSA conference schedule

April 20:
- Baltimore Reception Ayers Saint Gross 5:00 to 7:00 p.m.

May 4-7:
- Reception during AIA Conference in Philadelphia Date and Time TBA Pending AIA conference schedule
Career Services

The spring 1999 semester was a busy and exciting one for the School of Architecture Career Services office, led by Connie Caldwell, Director of Career Services for the School. Eleven firms were on campus to interview these students for full-time permanent positions and other students for summer jobs. Dean Hill, Kuehne, Richtman, CUHDA, Dagli-Saylor, Einhorn Yaffee Prescott, EwingCole, CherryBrott, Hiller, HLW, Payette Associates, Sublime Associates, Tobey + Davis and The Ritchie Organization each interviewed students in St. Scour Hall. Several firms made solid offers to students during the visit; others invited candidates to visit their firms during Spring Break for a second interview. Ashley McGraw, Bohlin Cywinski Jackson, King & King, Clark Patterson, Quinlivan Pisk & Krause and Sear-Brown also requested resumes for screening.

If your firm would like to recruit on campus, you may contact Caldwell by phone at 315-443-4837 or by email at ccaldwell@syrc.edu. She will work with you to develop a screening and interviewing process that meets your needs. Your campus visit can also include a presentation on the work of your firm.

Resume consultation is another service that Caldwell provides to both students and alumni. Active with the AIA Intern Development Program, she is the School's IDP Coordinator and has been invited to the annual AIA convention in Dallas to present a workshop on resume preparation for interns. If you are interested in a resume consultation, please fax your resume to Caldwell at 315-443-5083, and call or e-mail her with questions about IDP or other services available to alumni/aes and firms.

The Career Services office has established an e-mail distribution list so that job notices received by the School can be easily sent to alumni/aes. The list is also used to do informal salary surveys and pass on other career-related news. To join the list send an e-mail to ccaldwell@syrc.edu.

Community Design

Page 1

The workshop was conducted on Saturday, October 24th, 1998, in the gymnasium of St. Lucy's School near the site. The interaction of the students with the residents was promising and a great deal of progress was made in a short amount of time; by the end of the meeting five proposals were sketched out. The initial ideas that resulted from the one-day charette were then developed and refined for a public presentation one month later. The students built a balsa wood model and created large drawings and plans, perspectives and implementation phases to communicate the five development proposals.

Subsequently, Gamble, together with Pamela Heinze, Director of the University's Center for Public and Community Services, received funding to continue the project from a special fund at Syracuse University called the Vision Fund, which was created to support new and creative learning initiatives. Thanks to this funding, 20 students enrolled in an independent study course in the spring semester of 1999, which allowed them to develop the projects further. Based on the November community meeting and feasibility criteria, two of the original five projects were refined for a March presentation with the residents and the Director of Economic Development for the City of Syracuse. Students then developed a single scheme, which meets both the needs of the diverse community and the tight budget. The city sent out a Request for Proposals in late Spring based on the guidelines from the students' drawings and models and believes construction may begin as early as this year.

The partnership between the School of Architecture and the neighborhood is the first of its kind, and university and city officials hope it will pave the way for future collaborations between city neighborhoods and academic departments. Future workshops will include additional students and faculty from other disciplines within the university that deal with issues related to economic development, public policy and design.

The following students participated in the fall 1998 design charette: Undergraduate: second year – Lasha Brown, Michael Imbergamo, Maggie Kirk, Lee Morissette, Jeremy Munn, Ben Nicholson, Drew Watkins, Xiao Weng, Jeremy Zhuo; third year – Emily Buttrick, Joan Calaf, Kristen Kavanagh, Jason Laganga, Audra Manzino, Peter Mattioni, Jeffrey Sippell, Jason Willard, George Stewart; fourth year – Jonathan Taylor; fifth year – Ron Masotta; graduate – Maria Agostini, Nelson Carvalho, Rebecca Christman, Joseph Ho, Silas Jeffrey, Marcelo Ramos, and Shirshali Solanki.

Werner Seligmann 1930 - 1998

On November 12, 1998, faculty, students, alumni and staff of the School were saddened by the death of colleague, teacher, and mentor. Werner Seligmann, after an illness that lasted less than a year. For more than thirty-five years Seligmann was engaged in an active professional practice while building a distinguished career as an educator and scholar. His passionate enthusiasm, high standards, and boundless energy motivated countless young architects who are now teaching and practicing around the world.

Born in Osnabrueck, Germany, Seligmann was educated at Cornell University and the Technische Hochschule in Braunschweig, Germany. He taught at the University of Texas, Cornell University and at the GSD at Harvard before joining the faculty of Syracuse University in 1976 as professor and dean of the School of Architecture. He served as dean at Syracuse for 14 years before rejoining the faculty, and in 1992 he was named Distinguished Professor of Architecture. As dean he was widely credited for establishing the reputation of the School on an international, as well as on a national, basis. With his colleagues he re-established two master’s degree programs and re-instituted the architectural thesis requirement. The study abroad program in Florence was developed into a significant component of the school and may be considered to be one of his most significant accomplishments.

Seligmann held a number of premier guest critic positions at institutions worldwide during his career. He was the Eliot Noely Professor at Harvard in 1986; the Bishop Professor at Yale in 1987; the Thomas Jefferson Visiting Professor at the University of Virginia in 1994; and Professor at the ETH in Zurich from 1990 to 1992. In 1998, Seligmann was the recipient of the Topaz Medallion for Excellence in Architectural Education, given by the ACSA and the AIA jointly, for outstanding contributions to architectural education and for his influence on a broad range of students.

Seligmann was also a well-known critic, writer and lecturer, known for his commentaries on European modernism, and he was an expert on the works of Le Corbusier and Frank Lloyd Wright. Besides design, he taught architectural theory and urban design. He was named a Fellow of the American Academy in Rome in 1981. Throughout his academic career, Seligmann was the principal of an architecture and urban design firm, Werner Seligmann and Associates, which was founded in 1961. In the 1970’s and 80’s, his work on developing housing prototypes for the New York State Urban Development Corporation established Seligmann’s reputation in the area of housing. The work of the firm won two Progressive Architecture Design Awards, was illustrated on the cover of PA three times and placed or won in several national and international design competitions. Among these are projects for the Cardiff, Wales, Opera House, a Holocaust memorial in Berlin, and the Arizona State Historical Museum.

In all of his activities as educator, practicing architect, and scholar Werner Seligmann advanced his belief that architecture, and the teaching of architecture, is a noble profession. His contributions to teaching, scholarship, and the built environment will long be appreciated and valued.
Friends of the School of Architecture Fund

The Friends of the School of Architecture Fund provides the resources for many important programs at the School. Most of the annual contributions made by our alumni and friends are placed into this account, which underwrites our Lecture and Exhibition Series, faculty and student travel and research opportunities, funding for the Architecture Student Organization (ASO), and many other worthy activities at the School.

Your gifts to this fund are critical to the School and to the University. Our operating budget has been frozen for ten years. In order to continue the high quality innovative programming that our students and faculty depend upon, it is vital to maintain and increase giving to the Friends of the School of Architecture Fund. When you receive your annual telephone or mail solicitation from Syracuse University, please remember than you can always designate your giving to the School of Architecture. We rely on your support and thank you in advance for your generous contributions.

The Werner Seligmann Lecture Fund Endowment

The School of Architecture has launched The Werner Seligmann Lecture Fund Endowment. Established in memory of the many contributions of former Dean Werner Seligmann, the fund will support a lecture or series of lectures each academic year.

While he was dean of the School of Architecture, Seligmann established the tradition of inviting a broad spectrum of leading architects and educators from around the world to lecture to students and faculty. It was his belief that students benefited by listening to their own ideas against new and possibly opposing points of view, and that the influx of new ideas would generate dialogue and debate within the School.

The inception of the fund was announced publicly in June 1999. Although we are making good progress and hope to launch the lectures in spring of 2000, we are not yet close to meeting our goal of raising $300,000. If you have not yet made a pledge, we ask that you consider making a gift or a pledge at this time.

Louis Jay Masters Memorial Scholarship Fund

In Spring, Louis Jay Masters, class of 1989, passed away at the age of 32. To all that knew him, Louis was a passionate and talented individual. His commitment to the pursuit of architecture and to live his life to the fullest was admirable.

After graduation, Louis joined the firm of RTKL Associates Inc. in Washington, D.C. His talent, dedication, and love of architecture made him an extremely well-rounded and gifted architect. Lou's extensive travel in Europe added to his aesthetic development as an architect and helped to make Lou the unique individual he was.

A small group of Lou's family, friends, and colleagues would like to celebrate his life by establishing a memorial scholarship at Syracuse University. The Louis Jay Masters Scholarship Fund will provide financial support for study abroad. With the generous help of family, friends colleagues, and fellow SU alumni we can make a lasting contribution that will truly be a tribute to a wonderful, talented individual. Please join in this endeavor.

Yes, I want to support the School of Architecture with my gift to the following fund:

☐ Friends of the School of Architecture Fund
☐ The Werner Seligmann Lecture Fund Endowment
☐ Louis Jay Masters Scholarship Endowment
☐ one time gift
☐ or a three year pledge

Checks should be made payable to Syracuse University:
To pay by Visa or Mastercard please provide the following information:

☐ Visa ☐ Mastercard

Account Number ___________________________ Expiration Date __________
Signature of Card Holder ___________________________ Year of Graduation ________

Bruce Abbey was the chair of the Canadian Architectural Certification Board (CACB) team that reviewed the University of Montreal School of Architecture for its five-year accreditation in March 1989. He also served on the jury for the 1990 Boston Society of Architects' design awards in Fall 1990.

Laura Auerbach's design as Project Architect at Weston-Lubich and Dominico for the Queens-West Gantry Plaza and Community Park along the East River in New York City has been widely published, including in the New York Times Sunday Art and Architecture Section and in Landscape Architecture, January 1991.

Bruce Coleman was the featured speaker during a dual-event at the Temple Brith Sholom on September 5 honoring both the 30 year anniversary of the building of the Temple as well as its architect, Werner Seligmann. Coleman, who was a close associate of Seligmann's at the time the Temple was designed and built, gave a talk entitled "The Art of the Synagogue: The Designing of Temple Brith Sholom." Coleman discussed the development of Seligmann's design showing slides of his initial and final ideas for the building.

Lawrence Davis designed the Children's Interactive Gallery at the Everson Museum of Art in Syracuse. The gallery, which was dedicated during a grand opening celebration on November 8, 1990, is designed to acquaint beginning art viewers with the visual arts, and will help visitors to the museum interpret the Everson's collection by engaging in creative activities that teach basic art principles. Its construction is meant to instruct the viewer about the relationship between a building process and the significance of architecture. The project explores the relationship between subject and viewer through both a video projection system and physical openings in the walls which allow visitors to see the interactive station from the exterior of the gallery. Funding for the gallery was provided by the J.M. McDonald Foundation, the John Ben Snow Rotary Club Inc., and an anonymous foundation. Davis' recent work was exhibited at the Knowlton School of Architecture at The Ohio State University last March and in April in a show entitled "between EDEN and SAIS".

J. Francois Gabriel's book Beyond the Cube: The Architecture of Space Frames and Polyhedra earned an Honorable Mention in Architecture and Urban Planning from the Association of American Publishers, Inc. for his publisher, John Wiley & Sons Inc. Gabriel was also invited to discuss his book at the Structural Engineers' World Congress in San Francisco last July. A new book, Principles of Structures, by Michel Hanaco, includes a design by Gabriel for a habitable structure derived from pure geometry. The publisher is Blackwell Science Ltd.

David Gamble, Assistant Professor, together with Pam Heintz, Director of the Center for Public and Community Service, were awarded $1,500 from the 1990 Vision Fund Grant from Syracuse University for the creation of a Community Design Center. The purpose of the Vision Fund Grant is to encourage "visionary, experimental and creative ideas leading to the improvement of teaching and learning." The Community Design Center will be organized around a clinic-based, for-credit workshop offered each semester. The workshop will be interdisciplinary, collaborative endeavor between Syracuse University academic departments and the City of Syracuse. The course will be comprised of "real-world" projects which involve students, local residents, professional and non-profit organizations, community leaders and public officials in the participation of design, development, public policy and planning proposals. Gamble also had an exhibition in February at the University of Tennessee in Knoxville, School of Architecture of his sketches from travels to Europe.

Richard Jensen has received a grant from the Graham Foundation to complete his book on Clark & Menelee, Architects. The book will be published by Princeton Architectural Press. Jensen's project for an inter-disciplinary research laboratory situated in Wood Buffalo National Park, Alberta, and Northwest Territories, Canada, is featured in Digital Architecture: Computer Graphics from 50 Top Designers. The book is edited by M.S. Uddin and published by McGraw-Hill.

Mark Lindner was invited to participate in the concluding panel discussion on "Modern Architecture: An Incomplete Project" at the ACSA SE conference in October at the University of Tennessee at Knoxville. His essay, "Peculiar Autonomy: The Subject of Sculpture" was featured in the catalog of Charles Long's exhibition in April 1989 at Gallery Spennone, Rome, Italy. Another essay entitled "Wild Kingdom: Frederick Kiesler's Display of the Avant-Garde" was included in the catalogue. Moneypenny Press, 1990, a collection of essays in honor of Philip Johnson that was presented at a conference at Columbia and the Museum of Modern Art in 1989. A book review by Linder of Rosalyn Deutsche's Evictions: Art and Spatial Politics was published in the art journal, Documents (Spring 1990).

Susan Henderson has edited and written for the January 1990 issue of the journal Architectural Journal of the New York Society. The theme of the issue is the impact of Theosophy on architectural developments in the early twentieth century when Theosophy flourished among artists and architects. This issue attempts to suggest its appeal and its influence through a series of case study examples. Professor Henderson's article in the issue, "K.F.C. de Bazelaire: Architecture and de Bazelaire" explores the work of two early practitioners. The issue also includes a chapter on the Spangen-Housing district in Amsterdam designed by Willem Brandts, written by Ken Labana; one on van der Leuw House by Brinkman and van der Wijg, by Graham Livensay; and Alfred Will's contribution to the building at Krotosna, the Hollywood Theosophists colony. The essay is dedicated to the late Vilmos Szigeti whose interest in and knowledge of this period was profound. The issue can be found at http://www.societystudies.org/architecturaljournal/.

The July 1990 issue of the journal Housing Studies: The International Journal of Housing Research is a special issue devoted to self-help housing and will include Professor Henderson's article "Aided Self-Help Housing in the Weimar Republic: The Work of Ernst May." Self-help housing has been an ongoing strategy and controversy throughout the twentieth century. It concerns the ability of designers to help the homeless help themselves in constructing their own homes, usually with government-supplied materials and support. Professor Henderson's study investigates an extraordinary instance during the heyday of early modern housing programs in Germany of the 1920's.

The School became a gallery of work by students and faculty for review by the NAIAD team.

Christopher Gray and Arthur McDonald were jurors for the AIA Rochester Design Awards last October. Gray is the Chairman of the Undergraduate Program and was recently elected as Director of the Northeast Region of the Association of Collegiate Schools of Architecture (ACSA).

Patricia Waddy wrote an essay, "Inside the Palace: People and Furnishings," for the catalogue of the exhibition "Life and the Arts in the Baroque Palaces of Rome: Ambiente Barocco" at the Bard Graduate Center in New York, March 11-June 13, 1990, she also served on the Advisory Committee for the exhibition. Continuing her work with the Nicodemus Tessin the Younger Research Group at the National Gallery of Art, she is preparing for publication Tessin's "Tratte" de la decorazione interiure." Tessin was Sweden's leading architect) in the late 17th and early 18th centuries. He traveled widely throughout Europe and his keen observations of architecture especially in Italy and France formed the basis of his treatise, which has remained unpublished until now. Professor Waddy has received two fellowships in support of her research in Rome, from the National Endowment for the Humanities and the John Simon Guggenheim Memorial Foundation. In 1990-91 she researched and wrote a study of the architecture of the Palazzo Pallavicini-Rospigliosi (begun for Cardinal Scipione Borghese in 1617) in the 17th and 18th centuries. This will appear in a book on the palace and its collections to be published in fall 1999. She is also continuing her research for a book to be called "Between Palazzo and Casa: The Del Bufalo Family and Their Buildings in Rome." The Del Bufalo, a family of the lesser aristocracy, owned about a dozen buildings that form the basis for her study of the range of dwellings for the middle to lower strata of Roman society, in the urban and suburban zones of Rome. In a complicated facade, this structure provides an armature for the study through the seventeenth century. In spring 1999, she co-chaired sessions at two professional meetings in the United States: "Patron and Image, 1400-1700" (with John Belding Scott), for the Italian Art Society at the Annual Meeting of the College Art Association in Los Angeles in February; and "Francesco Borromini, 1599-1667" (with Tod A. Marder), at the annual meeting of the Society of Architectural Historians in Houston in April.
New Faculty

Since 1998, we have welcomed a number of talented and dedicated new faculty to the School of Architecture with an impressive array of credentials and expertise. Deborah Adams, Laura Auerbach, Rob Corser, and Mark Linder have accepted tenure-track positions after holding one-year appointments. Joining us for the 1999-2000 academic year is Martha Foss.

Deborah Adams received both bachelor’s and master’s degrees from Cornell University. She is a registered architect in New York State and the Commonwealth of Pennsylvania and has practiced with the firm of Bobbi Czyzinski Jackson. She began her own practice in 1988 and her professional work is primarily residential.

Before joining the Syracuse School of Architecture faculty in 1998, Professor Adams held the position of teaching associate at Cornell University. She currently teaches in the first-year design studio and offers seminars in advanced computer applications. Her specialty involves computer-related topics, specifically the implication of the digital environment on modes of representation and the study of the image.

Laura Auerbach earned a Bachelor of Fine Arts from Cornell University and a Master of Architecture from Yale University. She taught at the University of Michigan as a Visiting Assistant Professor from 1995 to 1999, where she held the Walter B. Sanders Fellowship in 1995-1996. She has also been a visiting critic and presented lectures at Cornell University, Rice University, the University of Pennsylvania, and the University of Virginia. She teaches second year design and contemporary urbanism at Syracuse.

Her research concentrates on the postindustrial urban landscape and issues of representation in the public realm. Her most recent work examines new urban paradigms by analyzing, mapping, and translating the fragmented urban fabric in Detroit. Michigan. Auerbach received a Graham Foundation Grant in 1996 for a project “Documenting a Multidisciplinary Design Process for the Public Realm.” This enabled her to conduct a series of charrettes titled “The Elusive Edge: a search for the threshold of Detroit” and mount an exhibition in the Architecture Gallery at The University of Michigan in December 1996. In addition to her critical and speculative work, Professor Auerbach has organized and participated in a series of community design charrettes for the Southwest Detroit Business Association, “Urban Prototypes,” focusing on site identification for redevelopment. She has also participated in various design competitions, entering the semi-finalist round for her work with Peterzon/Littenberg on “Berlin: Designing a Capital for the 21st Century The Spreebogen International Competition for Urban Design.” Her proposal for the Riverside Park South was exhibited at The Urban Center, Municipal Arts Society in the show titled “New Park; New Ideas, Riverside South Park”.

Rob Corser studied engineering at the United States Air Force Academy and the history of art at the University of New Hampshire before attending the University of Virginia, where he completed a master of architecture degree, receiving the AIA School Medal for academic excellence. While at the University of Virginia he taught an assistant for two courses: Introduction to Architecture and Fundamentals of Design.

Before attending graduate school, Professor Corser worked in the office of a structural engineer and as a building contractor. While in Charlottesville, Virginia he worked with Peter Waldman, Architect on “Parcel X”, a single-family residence featured in “AIA House #41 and #51, as well as in Architecture Magazine. He was a project designer for the firm Scriber Messer Brady & Wade, P.C., of Richmond, Virginia, where his design for an advertising agency received a 1995 Virginia AIA Design Award. Recently he has worked in San Francisco, California with Tamer Liddy Mayrum Stacy, Architects and Paul Thaggart Architects where he was project architect for a variety of housing, educational and commercial projects. Professor Corser is a licensed architect in the State of California.

During the 1998-1999 academic year Professor Corser taught Design Studio and Survey of Italian Architecture in the Syracuse University Program in Florence, Italy. His other academic interests include the relationships between urbanism, design and construction practice, and architecture’s basis in craft and tectonics.

After receiving a bachelors degree in architecture from the University of Virginia, Martha Foss worked as a project architect/designer for Bond, Comel, Westmoreland & Hiner Architects in Richmond, Virginia. One of her projects was an addition to a house which had been featured on the cover of the March 1999 issue of Progressive Architecture, the edition which she designed received a 1998 Virginia AIA Honors Award. She was also the project architect and designer for numerous renovations and additions to school buildings throughout Virginia. During this time she was active in the Richmond community as a tutor and mentor in the city schools.

Professor Foss earned a master’s degree at the University of Virginia, where she became a teaching assistant for an introductory computer modeling class, teaching FormZ, Photoshop, and Pagemaker. She also was a teaching assistant for the Yale Building Project, in which the first Year Design Studio designed and built a low-income house.

Mark Linder teaches design, theory and criticism. He received degrees in architecture from the University of Virginia, Yale, and most recently, Princeton, where he was awarded his Ph.D. in 1986. He has taught at the Georgia Institute of Technology, the University of Illinois-Chicago, Rice University, the Rhode Island School of Design, and the Harvard Graduate School of Design.

Linder’s research concentrates on twentieth century American architecture, with an emphasis on its intellectual and cultural influences. His most recent work examines the intersection of art and architectural criticism in the 1960s and the resulting incorporation of art practices into architectural design pedagogy. He has lectured throughout the United States and has participated in numerous symposia and conferences, including "After Urbanism" at the Graham Foundation in Chicago (1996) and "Open and Closed Representation" at the University of Pennsylvania (1996). His publications include contributions to the books Strategies of Architectural Thinking (1992) and Utopian and Ideology: Positioning an Architectural Avant-Garde in America (1997). His articles have appeared in AA Files, AAR, Architecture + Urbanism, Assemblage, Documents, and the Journal of Architectural Education. He is the editor of Scape, Elam and Bray, Critical Architecture/Architectural Criticism (1993). He has also written catalogue essays on the work of the artist Charles Long (1998) and Chris Garofalo (1997).
ALUMNI NEWS

Emeritus Professor Paul Malo (B. Arch '55) is completing a substantial book which he has co-authored with Robert Engel and Howard Kirschenbaum, entitled Santarone: From Japanese Temple to Adriodak Great Camp. The book will be published by Adriodak Architectural Heritage in late 1998 or early 2000, assisted by a grant from the Kaplan Foundation. Santarone is one of the Great Camps of the Adriodacks, as they are known, and is owned by the State of New York. The book is integral to a campaign for preservation, restoration and maintenance of the historic buildings on the site in Newcomb, New York. Malo will have a review article and two reviews appearing in the next three issues of the International Journal of the Classical Tradition, to which he is a regular contributor and referee for submissions. Along with these significant accomplishments, Malo was honored with a "Pillar of New York" award from the Preservation League of New York State at a luncheon on October 5 at the Waldorf-Astoria in New York City, in recognition of his lifetime commitment to the preservation of historic buildings of New York State. He served two terms as president of the Preservation League of New York State and has been active in campaigns to save landmark structures of the Adriodacks and elsewhere.

Peter Salins (B. Arch. '61) is Provost and Vice President for Academic Affairs, and President of the Research Foundation for the SUNY System Administration, rather than interim provost at SUNY Albany as noted in our last newsletter.

The Hillier Group has announced that David Erik Chase (B. Arch. '96) is now its Chief Executive Officer. With 20 years experience as founder and owner of his own architectural and engineering firm, Chase began his tenure with Hillier in 1996 as president of the Hillier Group, Pennsylvania.

Ashley McGrew Architects has announced that Robert Haley (B. Arch. '89) has joined the firm as Director of Design. With 30 years of experience in master planning and new construction, he has designed libraries, educational and corporate facilities and has also designed many landmark and award winning buildings in Syracuse and throughout New York State.

Darrel D. Rippeteau Jr. (B. Arch. '73) of Rippeteau Architects is pleased to announce that the firm received a 1998 AIA Pro Bono Publico Award for the Duane Rath House Whitman-Walker Clinic in Washington. The jury noted that "the combination of 'first-class' design and fundraising for a community based service was truly commendable."

Mark Warner (B. Arch. '73) has formed a company together with his wife Ellen Warner, called Ageless Design, Inc. Located in Jupiter, Florida, the firm consults with and counsels those in all areas related to healthcare and healthcare design. Warner is a national speaker on the subject of design that recognizes the specific demands of age-related conditions, and has released his first book entitled "The Complete Guide to Alzheimer's-Proofing Your Home," published by Purdue University Press. For more information visit their website at http://www.agelesdesign.com.

Haverson Architecture and Design PC, headed by Jay Haverson (B. Arch. '78) and Carolyn Weinberg-Haverson (B. S. CHD, '78) is engaged in a number of new projects including New River City, a 450,000 square foot retail and entertainment center in New Rochelle, New York.

The firm is also at work on the third Motown Cafe, located at CityWalk, Universal Studios in Orlando, Florida. Recent honors include a 1997 Connecticut AIA Award for Mediterranean, a modern, nautically themed restaurant in Greenwich, Connecticut.

James A. Wilson, AIA (B. Arch. '79) has been named president of the Philadelphia-based architectural, engineering, interior design and planning firm of Ewing Cole Cherry Brett. Wilson joined the firm after graduating from Syracuse University. Over the past 30 years, he has held a variety of positions there — from project architect and manager to design studio director and vice president of operations. He became a partner in 1986. From his offices in Philadelphia, PA, and Washington, DC, Ewing Cole Cherry Brett designs buildings for institutional, corporate and public sector clients nationwide. The 250-person firm, which is actively recruiting Syracuse University alumni, is known for its commitment to the design of health care, research and development, and sports and entertainment facilities.

Gregory Stanford (B. Arch. '81) was recently promoted to Senior Associate at Brennan Bee Gorman Monnier.

Nina Monastero (B. Arch. '82) has announced the opening of Monastero and Associates, Inc., an architecture and interior design firm in Cambridge, Massachusetts.

Mark Robbins (M. Arch. II, '92) has been named the Director of the National Endowment for the Arts in Washington. Prior to this appointment, Robbins was Curator of Architecture at the Watson Center for the Arts and Associate Professor at The Ohio State University. In announcing the appointment, NEA Chairman Bill Ivey stated that Robbins "will lead the Arts Endowment in strengthening the presence of design in this country and increasing awareness that design is an essential part of daily life." Robbins is an artist, curator and teacher trained in architecture, anthropology and film. He is the recipient of many awards including the Rome Prize from the American Academy in Rome, and fellowships from the New York Foundation for the Arts, the Graham Foundation, and the State Arts Councils of Ohio and New York.

David L. Swartz (B. Arch. '92) received a 1998 Young Architect Award which was presented to him during the AIA National Convention in San Francisco in May 1998. The award is made to individuals who, in an early stage of their architectural career, have shown exceptional leadership in design, education and/or service to the profession. The jury noted that Swartz is "an architect in pursuit of mastering the details of architecture, challenging architects to understand the technology of the buildings they create. A most gifted, technically competent designer."

Stephen Alltherr (B. Arch. '83) has recently joined the firm of Burt Hill Kosar Rittelmann in Pittsburgh, Pennsylvania. He is currently project designer of a 650,000 square foot facility for the Port Authority of Metro New York. Alltherr recently left Bohlin Cywinski Jackson, where he worked since 1987. He was project manager and co-designer of the Emerson Activities Building at Elmira College in Elmira, NY. That project received an honor award from the Pennsylvania Society of Architects in 1997.

King & King Architects has announced the promotion of two Syracuse alumni, Eric W. Witschi (B. Arch. '93), and Kirk W. Narburgh (M. Arch. '90), to the position of Associate.
A. Stevens Krug (B. Arch. '83) has joined the architectural and engineering firm of Nave, Newell & Stampfl, Ltd., in King of Prussia, Pennsylvania, as principal-in-charge of the Building Services Group. Previously Krug was in partnership with Wiederspahn Krug Architects in State College, and is an adjunct professor at The Pennsylvania State University. Most recently he was vice president for L. Robert Kimball and Associates in West Chester, Pennsylvania. Nave, Newell & Stampfl, Ltd. is a 90 person architectural and engineering firm.

Bruce Fairbanks (B. Arch. '85) was the architect of the new control tower for the Madrid/Barajas Airport in Spain, which came into operation in spring of 1998.

Scott U. Wails (B. Arch. '86) is executive vice-president of Bergman, Wails & Youngblood, Ltd., a firm which specializes in the field of casino resort architecture in Las Vegas, Nevada. Wails has been employed by the firm since soon after his graduation from Syracuse. During the past four years, he has been the architect of record for the expansion of the Caesars' Palace property in Las Vegas.

Richard Kahn (B. Arch. '86) is now a senior project architect with The Hillier Group in New York. He was previously employed at Benzaak Gold.

Richard Rosa (B. Arch. '88) has received the 1998 Rome Prize in Architecture. The Rome Prize is considered by many to be the most prestigious award in classical studies and the fine arts. In addition to his education at Syracuse, Rosa is an alumnus of Harvard University. He has taught at the University of Virginia and at Harvard. He has worked for Frank Gehry and has won numerous awards in architecture and painting. While in Rome, he plans to study the visible effects of the process of building and erasing. His study concentrates on the archaeologically decodable horizontal plates of both natural and built form that comprise the latent substructure of the city. Rosa also won an honorable mention in the 1998 Steedman Fellowship competition for recent architectural graduates. The Steedman Fellowship is sponsored by The Washington University in St. Louis.

Kathryn (Bengston) Barnsley (B. Arch. '89) announces the establishment of Barnsley O'Toole Architects, with her business partner, Martin O'Toole. The firm is located in Bowral, a country town 100 kilometers south of Sydney, Australia, and concentrates on commercial, recreational and residential projects including medium density housing both in regional areas across the state of New South Wales, and in Sydney.

Laura Carlson (B. Arch. '89) is a ten-year member of the Hillier Group and has recently been promoted to Senior Associate. She is an architect in the firm's Science and Technology Studio.

James A. McMullan (B. Arch. '90) was recently promoted to Associate at the firm Brennan Beer Gorman/Architects. A registered architect in New York and New Jersey, McMullan is a member of the AIA as well as the National Trust for Historic Preservation.

Scott Erdy (M. Arch. '90) and partner David McHenry have opened a new firm, Erdy McHenry Architecture in Haddonfield, New Jersey. http://www.em-arc.com/. Erdy was formerly director of design for The Hillier Group's Philadelphia office. Recent work includes the Southern Poverty Law Center in Montgomery, Alabama, which was completed in collaboration with Hillier, and the Suburban Cable Retail Prototype project. Erdy McHenry Architecture was featured in the July 1999 issue of Architecture Magazine, the "On the Boards" section is titled "The Next Generation," and focuses on the work of two young firms.

Melissa Weese Goodill (M. Arch. II '92) has won the 1999 Gabriel Price. The prestigious prize is awarded annually by the Western European Architectural Foundation for the pursuit of critical research on aspects of French architecture between 1830 and 1930. Weese, who teaches at the University of Maryland School of Architecture, will concentrate her research on the phenomenon of the passage, or commercial arcade, in France. Her research will analyze different aspects of the passage such as its vertical surfaces, its relationship to movement and sequence, its expression of the ritual of commercial exchange, and its function as an urban element.

Andrew Thurlow (B. Arch. '94) is Assistant Professor at the College of Architecture and Design at the University of Tennessee in Knoxville. Thurlow earned a Masters at Columbia University in 1998, after working for Ballinger in Philadelphia for a number of years.

Karin Varnik (B. Arch. '94) was awarded a Fulbright Grant to study architecture in Estonia. The theme of her proposal is "Prosperity and the pathetic momentum of the turn of the century in Tallinn" and will focus on the turn of this past century when the heightened spirit of nationalism influenced both the style of building as well as the shaping of the urban plan. Further research will then investigate the state of the country today, again newly independent and facing a new century, and the influences of technology, economics and patriotism on its current architectural landscape.

Heather Mitchell (M. Arch. '95) is now a corporate associate of The Boudreaux Group in Columbia, South Carolina. She is also President of the AIA/Greater Columbia chapter and is active with a number of civic organizations.

Matthew Burgher Master (B. Arch. '97) received an honorable mention in the 1998 Steedman Fellowship competition for recent architectural graduates. The Steedman Fellowship is sponsored by The Washington University in St. Louis.

Brian West (B. Arch. '97) is pursuing graduate studies at the University of Pennsylvania in the School of Fine Arts, in the program on City Planning. West has been awarded a HUD Community Development Fellowship in support of his studies.

Jill Morgan (B. Arch. '98) has joined the Auburn, New York firm Beardeley Design Associates. She will be part of the design team for the 1999 capital construction project for the Webster School District.

Jayesh Hariyani (M. Arch. II '99) and his wife Bindi Hariyani won a Commandation Award for Private Residential Building under the South Asian Architecture Architect of the Year Awards program. Their entry in the Residential Project category of this international competition was a private residence at Ghavnagar.
