All about LibGuides

- LibGuide software gives libraries the opportunity to organize information on any kind of topic in an online environment.
- LibGuides and LibAnswers are terrific online tools that allow libraries to offer the same services to in-house and off-site users. Whether you are helping someone at the reference desk, giving a library lecture or have patrons looking for assistance when the library is closed - LibGuides and LibAnswers work together and connect to each other via embedded links/urls and provide excellent ways to effectively communicate with and educate library users.

FAQ on LibGuides

How much does it cost?

$ 

The pricing is based on the size of your institution (FTE for academic, or # of card holders for public), and ranges between $899/year and $2,999/year ($549 for K-12). Most libraries would be in the lower price range – email us for an exact quote, and chances are you’ll be pleasantly surprised.

---

Hello,

We wanted to let you know that Deirdre Joyce at Masters Programs in Library & Information Science (http://libraryschool.campusguides.com) used your “What is a LibGuide?” guide as a template for a new guide they created. As the saying goes - imitation is the sincerest form of flattery!

However, if you are unhappy that your guide was used as a template or if it was used without your permission, you may email this user directly (djoyce@circ.org) or email Springshare support (support@springshare.com) and we’ll contact this User and punish them severely (just kidding).

Please do not reply to this message, as replies will be routed to an unmonitored mailbox. If you have questions about the content of this message, or need any other assistance, please visit http://libraryschool.campusguides.com/support.php to submit a support ticket.
