What Is Open Data?

- Is freely available on the internet;
- Permits any user to download, copy, analyze, re-process, pass to software or use for any other purpose; and
- Is without financial, legal, or technical barriers other than those inseparable from gaining access to the internet itself.

- Scholarly Publishing and Academic Resources Coalition

Why would anyone want to give up their data?

Hastens discovery

Enables new discovery

Improves integrity/transparency

Saves money and time

Increased recognition

Open Access is Nothing New

What is Data Management?

"Data management is the development, execution and supervision of plans, policies, programs and practices that control, protect, deliver and enhance the value of data and information assets."

- Data Management Association International

The organization, documentation and preservation of data created and gathered during the course of a research project.

NIH Data Sharing Policy

Data sharing is essential for expedited translation of research results into knowledge, products and procedures to improve human health.

The [Final NIH Statement on Sharing Research Data](#) was published in the NIH Guide on February 26, 2003. This is an extension of NIH policy on sharing research resources, and reaffirms NIH support for the concept of data sharing. The new policy becomes effective with the October 1, 2003 receipt date for applications or proposals to NIH.

- [Data Sharing Regulations/Policy/Guidance Chart for NIH Awards](#) (08/30/2006) - (MS Word - 58 KB) - This chart is designed as a quick guide only for the purpose of identifying various data sharing regulation/policy/guidance documents applicable to NIH funding.
- [NIH Guide Notice](#) (02/26/2003) - Final NIH Statement on Sharing Research Data.
- [NIH Guide Notice](#) (03/01/2002) - NIH Announces a Draft Statement on Sharing Research Data.
- [NIH Data Sharing Policy and Implementation Guidance](#) (03/05/2003) - Guidance providing the NIH policy statement on data sharing and additional information on the implementation of this policy.
-  [Frequently Asked Questions - Data Sharing](#) (02/16/2004) - Listing of Frequently Asked Questions that will be updated as new questions are received. Please check back periodically for new questions and answers.
- [Data Sharing Workbook](#) (PDF - 75 KB) or (MS Word - 74 KB) - (02/16/2004) - Workbook to show how investigators working in a variety of scientific areas have shared their data.
- [NIH Data Sharing Brochure](#) (PDF - 244 KB) - (05/20/2003) - Printable brochure that summarizes main elements of the NIH Data Sharing Policy.
- [Testimonials](#) (MS Word - 22 KB) - (03/05/2003) - First-hand accounts from researchers who have shared data.
- [Other Data Sharing Documents and Resources](#) (02/19/2004) - Additional resources relating to data sharing.
- [For NIH Staff Use](#) - (02/16/2004)

Dissemination and Sharing of Research Results

NSF DATA SHARING POLICY

Investigators are expected to share with other researchers, at no more than incremental cost and within a reasonable time, the primary data, samples, physical collections and other supporting materials created or gathered in the course of work under NSF grants. Grantees are expected to encourage and facilitate such sharing. See [Proposal & Award Policies & Procedures Guide \(PAPPG\) Chapter XI.D.4](#).

NSF DATA MANAGEMENT PLAN REQUIREMENTS

Proposals submitted or due on or after January 18, 2011, must include a supplementary document of no more than two pages labeled "Data Management Plan". This supplementary document should describe how the proposal will conform to NSF policy on the dissemination and sharing of research results. See [PAPPG Chapter II.C.2.j](#) for full policy implementation.

REQUIREMENTS BY DIRECTORATE, OFFICE, DIVISION, PROGRAM, OR OTHER NSF UNIT

Links to data management requirements and plans relevant to specific Directorates, Offices, Divisions, Programs, or other NSF units, are provided below. If guidance specific to the program is not provided, then the requirements established in [PAPPG Chapter II.C.2.j](#) apply.

Please note that if a specific program solicitation provides guidance on preparation of data management plans, such guidance must be followed.

Expanding Public Access to the Results of Federally Funded Research

FEBRUARY 22, 2013 AT 12:04 PM ET BY MICHAEL STEBBINS

Summary: The Obama Administration is committed to the proposition that citizens deserve easy access to the results of research their tax dollars have paid for. That's why, in a policy memorandum released today, OSTP Director John Holdren has directed Federal agencies with more than \$100M in R&D expenditures to develop plans to make the results of federally funded research freely available to the public—generally within one year of publication.

The Obama Administration is committed to the proposition that citizens deserve easy access to the results of scientific research their tax dollars have paid for. That's why, in a policy memorandum released today, OSTP Director John Holdren has directed Federal agencies with more than \$100M in R&D expenditures to develop plans to make the published results of federally funded research freely available to the public within one year of publication and requiring researchers to better account for and manage the digital data resulting from federally funded scientific research. OSTP has been looking into this issue for some time, soliciting broad public input on multiple occasions and convening an interagency working group to develop a policy. The final policy reflects substantial inputs from scientists and scientific organizations, publishers, members of Congress, and other members of the public—over 65 thousand of whom recently signed a *We the People* petition asking for expanded public access to the results of taxpayer-funded research.

To see the new policy memorandum, please

visit: http://obamawhitehouse.archives.gov/sites/default/files/microsites/ostp/ostp_public_access_memo_2013.pdf

To see Dr. Holdren's response to the *We the People* petition, please

Data Management & Curation

ICPSR stores, curates, and provides access to scientific data so others can reuse the data and validate research findings. Curation, from the Latin "to care," is the process that ICPSR uses to add value to data, maximize access, and ensure long-term preservation.

Data curation is akin to work performed by an art or museum curator. Through the curation process, data are organized, described, cleaned, enhanced, and preserved for public use, much like the work done on paintings or rare books to make the works accessible to the public now and in the future. With the modern Web, it's increasingly easy to post and share data. Without curation, however, data can be difficult to find, use, and interpret. Through curation, ICPSR provides meaningful and enduring access to data.

Quality

Data at ICPSR are enhanced with meaningful information to make it complete, self-explanatory, and usable for future researchers. As a repository, ICPSR adheres to standards that demonstrate it is organizationally, procedurally, and technologically sound as a trustworthy data custodian.

- [Preparing Data for Archiving](#)
- [Guide to Archiving Social Science Data for Institutional Repositories](#)  (pdf)
- [Curating Data at ICPSR](#)

Preservation

Digital preservation is the proactive and ongoing management of digital content to lengthen the lifespan and mitigate against loss. ICPSR preserves its data resources for the long-term, guarding against deterioration, accidental loss, and digital obsolescence. ICPSR has a 50-year track record of reliably storing research data.

- [Trusted Digital Repositories](#)
- [Digital Preservation Policies and Planning at ICPSR](#)

Access

ICPSR hosts data in a repository with powerful search capabilities. Indexed by all the major search engines, ICPSR data are easily

Confidentiality

Data at ICPSR are screened for confidentiality and privacy concerns. Stringent protections are in place for securing and distributing sensitive

Replication Data for: "The loss of Latin OV: Steps towards an analysis" Version 1.0

Danckaert, Lieven, 2017, "Replication Data for: "The loss of Latin OV: Steps towards an analysis"", doi:10.18710/VWDJ1Y, DataVerseNO, V1

 Cite Dataset

 Learn about Data Citation Standards.

Description

In this paper I offer a first attempt to analyse the loss of OV word orders in Latin/Romance. Assuming Yang's (2000, 2002) variational acquisition model of language change, I suggest that the eventual decline of the OV grammar can be traced back to an independent change in the grammar of Latin, namely one concerning the way in which the clausal EPP requirement is satisfied (Danckaert 2017). The crucial Late Latin innovation is argued to be the development of optional A-movement for subjects: as an indirect result of this, in the Late Latin period the VO grammar is more robustly cued than the OV grammar, despite the fact that the overall frequency of the order VO remains more or less constant over time (and in certain environments even decreases). Given this result, Yang's model correctly predicts the VO order to oust the competing OV pattern. I also show that the rate of object extraposition (which yields linear VO sequences) remains fairly stable during the lifespan of the Latin language, which suggests that this phenomenon is unrelated to the spread of the VO order. Finally, the rate of object shift (i.e. a non-local type of OV) can in fact be shown to increase over time. This development too is suggested to be related to the new setting of the EPP parameter and the novel patterns of subject placement that follow from it.

National Longitudinal Study of Adolescent to Adult Health (Add Health), 1994-2008 [Public Use] (ICPSR 21600)

Principal Investigator(s): Harris, Kathleen Mullan, University of North Carolina-Chapel Hill; Udry, J. Richard, University of North Carolina-Chapel Hill

Summary:

The National Longitudinal Study of Adolescent to Adult Health (Add Health), 1994-2008 [Public Use] is a longitudinal study of a nationally representative sample of U.S. adolescents in grades 7 through 12 during the 1994-1995 school year. The Add Health cohort was followed into young adulthood with four in-home interviews, the most recent conducted in 2008 when the sample was aged 24-32. Add Health combines longitudinal survey data on respondents' social, economic, psychological, and physical well-being with co... [more info](#)
