Description

Triple triumph: Three women in medicine is the story of three physicians.

Three physicians, all women, each perceived serious unmet needs in their fields, and envisioned imaginative approaches to meeting those needs. Each encountered resistance, discouragement, and obstruction from the traditional, male-dominated departments in which they worked. These powerful pioneers, undeterred, created programs that earned the highest levels of national distinction and acclaim. Their work and their names are now legendary—in geriatric medicine, in the treatment of breast cancer, and in diabetes research and treatment. Their stories differ, but the commonalities help us understand why constructive change is often so hard-won, and what it takes in commitment, courage, and tenacity to triumph in the end. Sharon Brangman, Patricia Numann, and Ruth Weinstock are inspiring heroes, from whom we can all learn essential lessons.

ABOUT

Linda Galloway is the STEM Collection Development and Analysis Librarian, and the subject specialist for chemistry and forensic sciences at Syracuse University Libraries. Linda is passionate about connecting students, faculty, and researchers to the best information available by promoting the libraries' resources and providing value-added content and collaborative services. Linda holds a M.S.L.I.S. from Syracuse University and a B.S. in chemistry from Long Island University.

Biography

Anne E. Rauh is a Collection Development and Analysis Librarian at Syracuse University Libraries. She holds a B.A. in International Studies and a M.A. in Library and Information Studies, both from the University of Wisconsin-Madison. Anne is an active member of the American Society for Engineering Education and the Eastern New York Chapter of Association of College and Research Libraries. She has presented at conferences throughout the country and has published extensively on Science and Engineering Librarianship. Her research interests include collection development, open access, scholarly impact, and publishing and scholarly communication.

Why?

Definition

“Open Access is the free, immediate, online availability of research articles coupled with the rights to use these articles fully in the digital environment”

<https://sparcopen.org/open-access/>

Increased Citations

“*PLoS Biology* publishes today a research article by Gunther Eysenbach that is not about biology. It is about citations. It provides robust evidence that open-access articles (OA articles) are more immediately recognized and cited than non-OA articles.”

MacCallum CJ, Parthasarathy H (2006) Open Access Increases Citation Rate. *PLoS Biol*4(5): e176.
doi:10.1371/journal.pbio.0040176

Increased Citations to Self Archived Work

“Results show that self-archived articles have a 22% higher citation rate than articles that were not self-archived, and that the difference is statistically significant.”

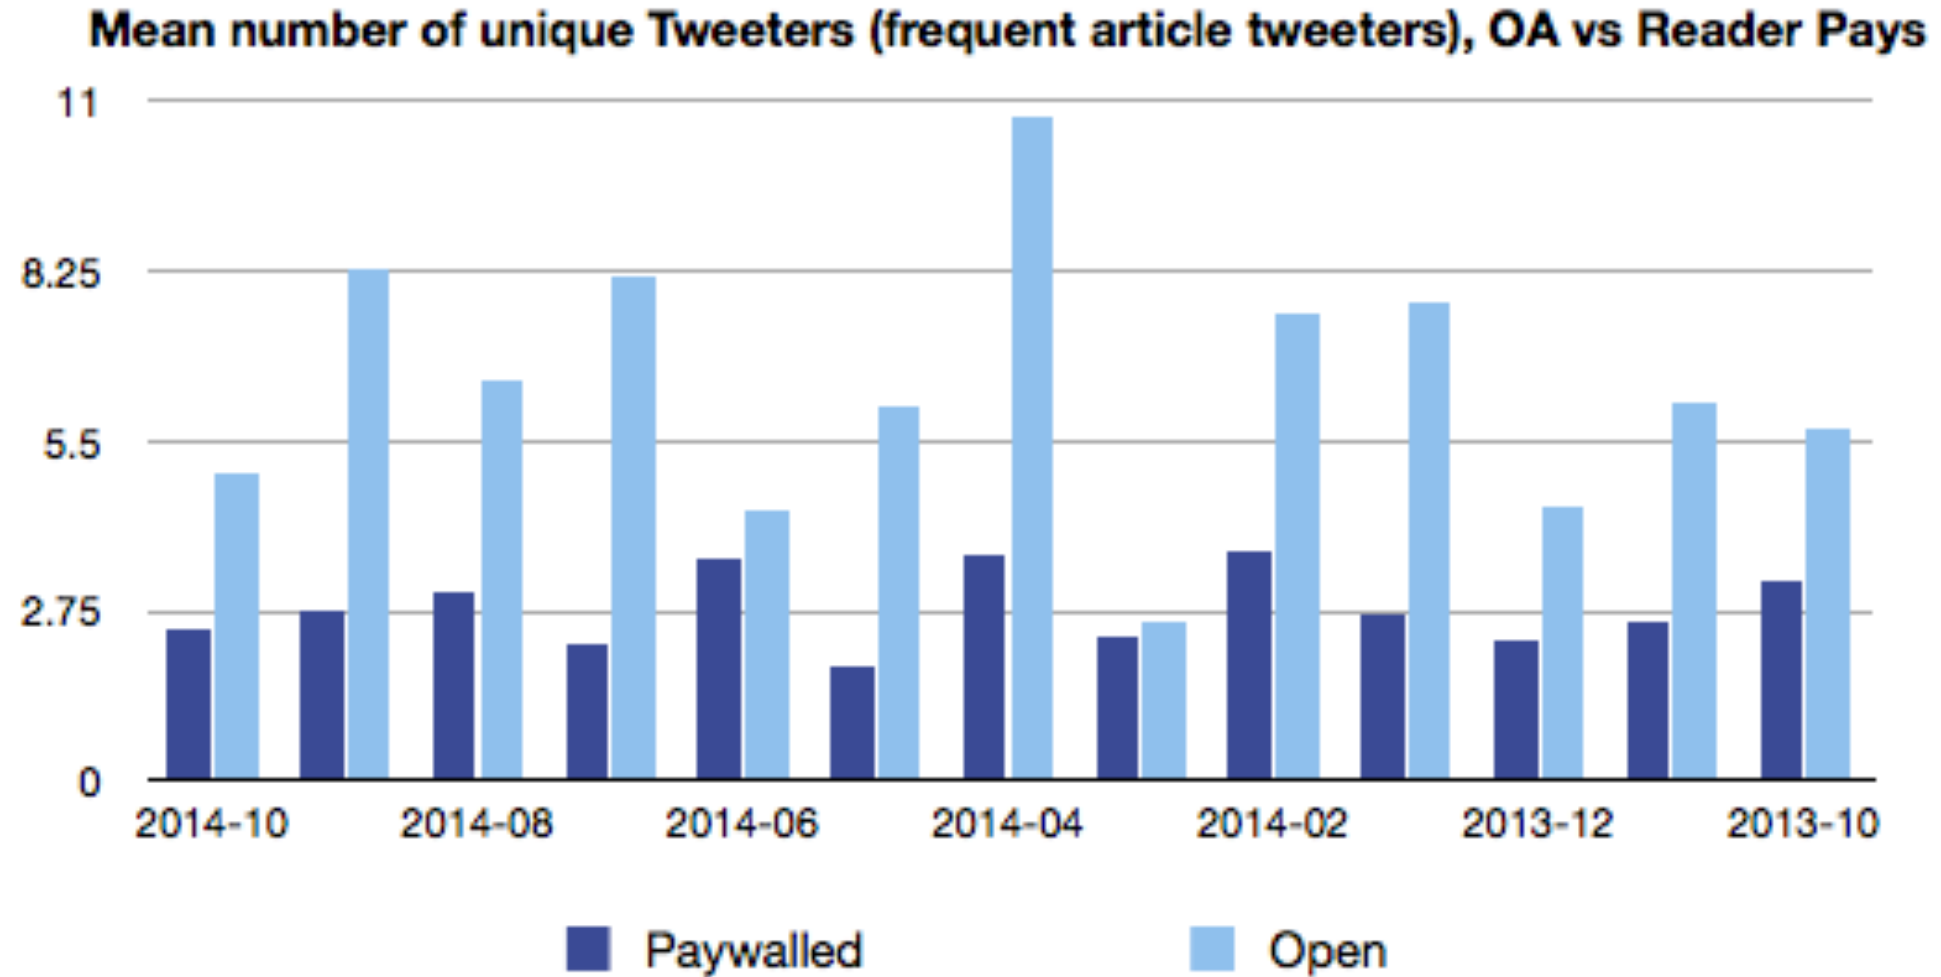

Lars Kullman, "The Effect of Open Access on Citation Rates of Self-Archived Articles at Chalmers." Proceedings of the IATUL Conferences. Paper 2. <http://docs.lib.purdue.edu/iatul/2014/bibliometrics/2>

Open Access Citation Advantage

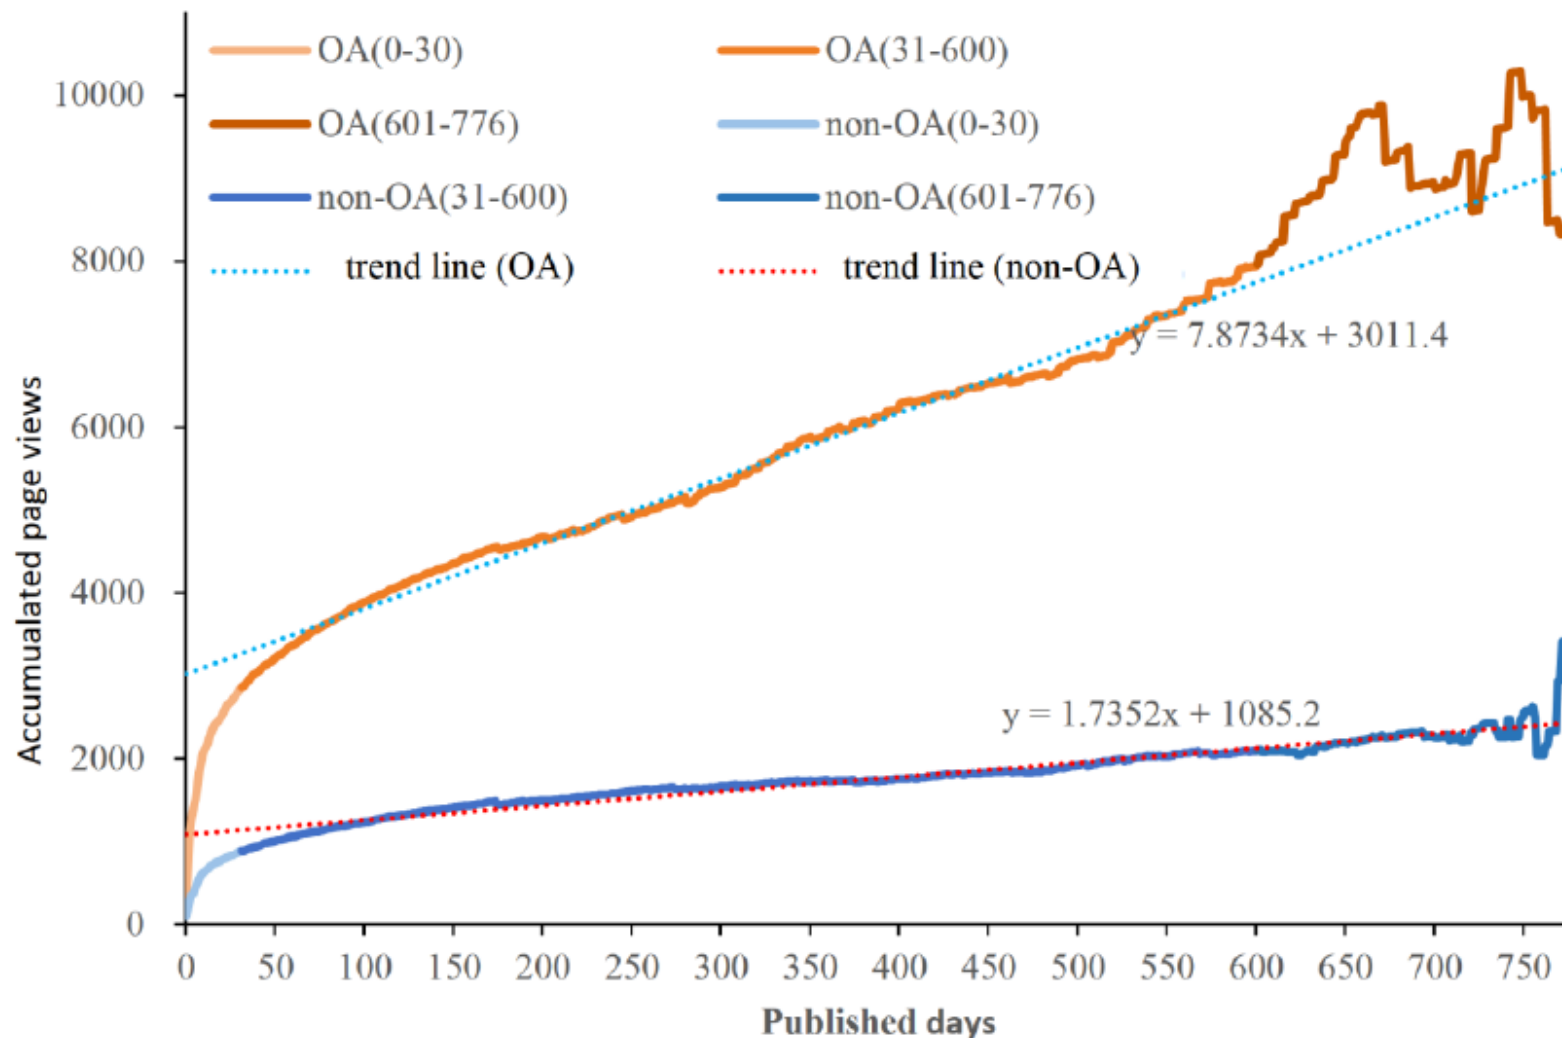

“As of January 2016, based on my review of all studies listed in this bibliography, it seems highly probable that open access articles have a citation advantage over generally equivalent toll access articles in many, if not most disciplines.”

Ben Wagner Wagner, A. Ben. (2010). Open Access Citation Advantage: An Annotated Bibliography. *Issues in Science & Technology Librarianship*, (60). Updated and annotated 2016.
