IS THERE LANGUAGE ATTRITION IN BRAZILIAN PORTUGUESE SYLLABIC PATTERNS DUE TO THE DEVELOPMENT OF ENGLISH-L2?

Abstract: This poster discusses mutual influences between Brazilian Portuguese as a First Language (L1) and English as a Second Language (English-L2). It questions if some changes in syllabic patterns in BP are due to language attrition.

Anderson Silva

INTRODUCTION

Language attrition is the emergence of changes in the L1 system caused by low frequency of use in the L1 or immersion in a L2 speaking community.

Kopke et al. (2007) / Schmid (2011)

Café – Coffee

Clube - Club

Thesis statement: The changes on BP syllabic patterns of speakers of English-L2 in the US are caused by language attrition due to mutual influences between both language systems. But the changes on BP syllabic patterns of speakers of English-L2 in Brazil are an emerging state on the language system due to self-organization.
