Trials Process

Syracuse University Libraries welcome feedback about the following resources that are available to trial during February 2019. Trial access is available on campus only. Faculty, staff, and student feedback is an important part of our evaluation process. Please note that we are exploring these resources for future consideration and that there is no guarantee that we will be to add them to the collection, especially within a specific time frame.

Resources

- [American Indian Newspapers](#)

Sourced from the Sequoyah National Research Center at the University of Arkansas at Little Rock and the Newberry Library in Chicago, this collection covers American Indian history in North America from 1828 to 2016 and offers American Indian perspectives on federal and tribal politics, self-representation, environmental activism, the American Indian Movement, tribal schools and colleges, local news coverage, and more. Trial available through March 1, 2019.

Feedback

Please submit feedback for each resource you explore.

Environmental History

Robert Wilson

LAST REVIEWED: 05 MAY 2017
LAST MODIFIED: 27 JULY 2016
DOI: 10.1093/OBO/9780199874002-0140

Introduction

Environmental history is the study of the relationship between society and the environment over time. This broad definition hides as much as it reveals since fields in the natural sciences such as biology and geology (or subfields of geography, such as historical geography and political ecology) also study the interactions between humans and the rest of nature. What distinguishes the approach of historians and geographers to environmental history from that of other scholars is an emphasis on historical context and how social divisions such as class, race, and gender affect people's relationship with and use of the nonhuman world. Environmental history emerged as a field in the 1970s, although it has deep antecedents in the disciplines of history and especially geography. Although most environmental historians are from the discipline of history, geographers, with their abiding interest in society-environment relations, have played and continue to play a role in the development of environmental history as a field.

The screenshot shows the top navigation bar of the Experts@Syracuse website. On the left is the Syracuse University logo in orange. On the right is a 'Help & FAQ' link. Below the navigation bar is a central heading 'Welcome to Experts@Syracuse'. Underneath is a search bar with a dropdown menu set to 'All content', a search input field containing the text 'Explore profiles, expertise and research at Experts@Syracuse', a search icon, and a settings icon. Below the search bar is a row of six category tiles, each with an icon, a count in a dark box, and a label: 'Profiles' (697), 'Research Units' (61), 'Grants' (2331), 'Research Output' (28754), 'Activities' (580), and 'More' (9766).
