DETAILS MATTER
A PAVILION FOR INDIA IN VENICE

RAJKUMAR KADAM

ADVISOR: LARRY DAVIS
The persistent cultural identity of Indian architecture resides in the assembly of its components and the specific functions they are intended to perform. As Charles Correa mentions in the book “Vistara”, Indian architecture has historically evolved through time and space, shaping itself through India’s global discourse – a dichotomy of established building traditions and foreign cultural influences. The evolution of this architecture can be understood through traditional Hindu temples, Buddhist stupas, Mughal Islamic structures, British colonial influences, and post-colonial modernist architecture.

Over the years, new myths have come into being, been absorbed, ingested, internalized – and finally transformed into a new architecture1. However, even as the centuries have passed, Indian architecture has been classified as a product of certain elements that have persisted through the ages. These key elements are: relationship to immediate context, relationship to natural elements – earth, water and sky, plan-based organizational tools (mandala), constantly changing intimacy of spaces, emphasis through repetition, garden spaces and rising plinths. Each of these elements perform a specific function. For instance, the mandala is a reflection of man’s relationship to the cosmos and increasingly intimate spaces express movement towards the sacred. Hence, Indian architecture is understood as the product of an assembly of such details.

To explore the spatial conditions these details could produce, this thesis proposes a national pavilion for India at the Venetian Arsenal, one of the sites for the Venice Biennale. The design of a pavilion for India at the Venice Biennale is an opportunity to understand architecture as a vehicle that illustrates values that are simultaneously universal, and culturally specific. While the proposed Indian pavilion incorporates the details that define Indian architecture, they are appropriated to the highly articulate Venetian context because principally, Indian architecture is malleable and fits within its local environment. This cross-cultural representation is accomplished through symbolic relationships to natural elements and site, abstract architectonic form and space, and in particular construction detailing. In this regard, it becomes important to consider the details and material palette of Carlo Scarpa’s work in Northern Italy. Scarpa produces coherent details that exude the culturally rooted architecture of Venice. Improvising the functional components of Indian architecture to fit into the context of Venice would expand India’s global discourse, giving rise to new myths and metamorphosing architecture in India.

BIBLIOGRAPHY

55 Door Handles, or what is a Detail? / Edward R. Ford.

Carlo Scarpa, Architect: Intervening with History / Carlo Scarpa, R. Nicholas Olsberg, George Ranalli, Jean-François Bédard, Sergio Polano, Alba DiLieto, Mildred S. Friedman, Guido Guidi.

Carlo Scarpa: Architecture in Details / Bianca Albertini, Alessandro Bagnoli

Carlo Scarpa a Castelvecchio / Licisco Magagnato.

Carlo Scarpa’s Tomba Brion / Guido Guidi, Antonello Frongia.

Concepts of Space in Traditional Indian Architecture / Yatin Pandya; Drawings and Architectural Graphics Yatin Pandya and Vastu-Shilpa Foundation for Studies and Research in Environmental Design.

Elements of Indian Architecture / José Pereira.

Frank Lloyd Wright: Between Principle and Form / Paul Laseau, James Tice.

Frank Lloyd Wright’s Usonian Houses: The Case for Organic Architecture / by John Sergeant.

Formal Structure in Indian Architecture.

Indian Temple Architecture: Form and Transformation: The Karnāṭa Drāvida Tradition. 7th to 13th Centuries / Adam Hardy; foreword by Kapila Vatsyayan.

Paradigms of Indian Architecture: space and time in representation and design / edited by G.H.R. Tillotson.

Strange Details / Michael Cadwell.

The Details of Modern Architecture / Edward R. Ford.

The Tell the Tale Detail / Marco Frascari.

Querini Stampalia Foundation: Carlo Scarpa / Richard Murphy, Giorgio Busetto.
