## Overview

On November 4th, the Bureau of Labor Statistics (BLS) reported that *employment increased by 261,000 in October, and the unemployment rate rose to 3.7 percent. Notable job gains occurred in health care, professional and technical services, and manufacturing.*<sup>1</sup> For veterans, unemployment decreased to 2.5 percent in October. Post-9/11 veteran unemployment increased from 2.3 percent to 2.8 percent. The overall unemployment trend varies by different veteran demographic factors, however, some more than others.

With respect to age, the unemployment rate for veterans ages 18-24 decreased in October, from 6.7 percent to 5.6 percent. The unemployment rate for veterans ages 25-34 increased from 1.8 percent to 2.5 percent. During this period, veterans ages 18-24 were unemployed at a lower rate than their nonveteran peers of the same age group (7.6 percent). Veterans 25-34 were unemployed at a lower rate than their nonveteran peers of the same age group (3.8 percent). The unemployment rate for veterans ages 65 and older decreased in October, from 3.1 percent to 2.3 percent. Veterans ages 65 and older were unemployed at a higher rate than their nonveteran peers of the same age group in October (2.1 percent).

The unemployment rate for female veterans decreased in October, from 3.7 percent to 2.3 percent. By comparison, female nonveterans have an unemployment rate of 3.5 percent. The unemployment rate for male veterans increased in October to 2.6 percent. By comparison, male nonveterans have an unemployment rate of 3.3 percent.

The unemployment rate for Black or African American veterans decreased to 2.7 percent in October. This rate is lower than the unemployment rate of their nonveteran counterparts (6.0 percent). The unemployment rate for Hispanic, Latino/a, or Spanish Origin veterans increased to 1.6 percent in October. This rate is lower than the unemployment rate of their nonveteran counterparts (3.8 percent). Readers should be cautioned, however, that data on specific veteran subgroups can vary widely from month to month.

**NOTE:** Although the BLS reports the national average for those 16 and over, the tables above include only those that are 18 and over to make a more accurate comparison to the veteran population. Post-9/11 are of the Gulf War Era II (September 2001-present). Other periods of service include Gulf War Era I (August 1990-August 2001), Vietnam Era (August 1964-April 1975), Korean War (July 1950-January 1955), World War II (December 1941-December 1946). Veterans who served in more than one wartime period are classified only in the most recent one. Veterans who served during one of the selected wartime periods and another peacetime period are classified only in the wartime period. The minority-by-gender unemployment rates are not displayed due to small sample size and are more appropriately displayed as annual averages.
