Facing page: As explorer-in-residence at the National Geographic Society, Wade Davis has visited some of the most remote and exotic locations on Earth. Davis shared images and insights gleaned from his remarkable adventures as part of the University Lectures Series. His lecture, "Light at the Edge of the World: A Journey through the Realm of Vanishing Cultures," was given in Hendricks Chapel to an audience enthralled by his presentation. The University Lectures brings to Syracuse University individuals of exceptional accomplishment in the areas of architecture and design; the humanities and the sciences; and public policy, management and communications.

Below, left: Students from the Syracuse City School District photographed their worlds, then wrote about their experiences as part of the Partnership for Better Education's Literacy, Community and Photography program. Syracuse University has joined with other area institutions of higher education to offer Syracuse City School District students new opportunities for quality instruction.

Below, top right: Nicole Michael '10, the reigning BIG EAST Freshman of the Week, led the Orange with 21 points, her seventh 20-point output of her rookie season, as SU defeated Villanova, 62-51, at the Carrier Dome.

Below, bottom right: The College of Arts and Sciences and The Dana Foundation presented a panel discussion, "Understanding the Circuits of the Brain: New Treatments for Parkinson's Disease, Depression, and Epilepsy," as part of their "Speaking of Science" series in Washington, D.C. The event was hosted by *New York Times* columnist and author William Safire '51, H'78 and featured prominent neurologists, including Richard Mayeux, the Sergievsky Professor of Neurology, Psychiatry, and Epidemiology at Columbia University, shown with Safire.
