

Question Type	Examples from ECC RQs
1. Rhetorical	What is the future of library cataloging standards?
2 Descriptive	
2.1 Existence	What kinds of tensions exist between public and technical service librarians?
2.2 Instance/Identification	Are catalogers framing discussions of what they do in out-of-date terminology?
2.3 Definition	What is the impression of catalogers to non-catalogers/non-librarians?
2.3.1 Nature	What constitutes quality metadata/quality bibliographic records?
2.3.2 Label	<i>No examples identified in ECC dataset</i>
2.3.3 Meaning	What does it mean for a library to be ready for the future of cataloging?
2.4 Character	What characterizes the cataloging staff's level knowledge / information in library "haves" and "have nots"?
2.4.1 Composition	What are the fundamental components of cataloging work?
2.5 Function	To what extent are catalogers perfectionists?
2.5.1 Modes	What do systems do with bibliographic data?
2.5.2 Uses	<i>No examples identified in ECC dataset</i>
2.5.3 Means	How do catalogers make judgments about when consistency is important and when it is not important?
3 Comparative	
3.1 Concomitance	<i>No examples identified in ECC dataset</i>
3.1.1 Conjunction	<i>No examples identified in ECC dataset</i>
3.1.2 Disjunction	<i>No examples identified in ECC dataset</i>
3.2 Equivalence	How does a system like WorldCat Local compare to a traditional ILS?
3.3 Difference	What are the differences among records from different sources: vendors, Amazon, Google?
3.3.1 Disproportion	Do libraries staff more public services staff than technical services staff?
3.1.2 Subordination	<i>No examples identified in ECC dataset</i>
4 Contingent	
4.1 Relation	What is the relationship between "quality" and "completeness"?
4.2 Correlation	Does the number and expertise of cataloging staff correspond to an increased quality of bib records?
4.3 Conditionality	<i>No examples identified in ECC dataset</i>
4.3.1 Consequence	Will RDA implementation cause decreased technical services staffing?
4.3.2 Antecedence	Why have no / so few computer programs been created that will do the most easily automated cataloging work?
4.3.3 Comparative	Does decreased or lack of technical services staffing (especially, in staff who configure ILSs) affect the ability of libraries to implement automation processes that would offset the problems created by decreased technical services staffing?
4.3.4 Interactive	How will RDA affect cataloging consistency across institutions?
4.3.5 Comparative Interaction	<i>No examples identified in ECC dataset</i>

4.4 Biconditionality	<i>No examples identified in ECC dataset</i>
5 Evaluative	How effective are vendor products that enhance the catalog (such as discovery services, tags)?
6 Normative	
6.1 Existence	How can we [catalogers, administrators] get information out to the public regarding the importance of cataloging?
6.2 Judgement	What criteria should be used when choosing a metadata standard?
7 Deliberative/Metaphysical	What is the potential of RDA to facilitate creation of a multi-dimensional data environment?
